

PRINCIPAL'S MESSAGE

Principal
Mrs. Sarika Singh

“If a child can't learn the way we teach, maybe we should teach the way they learn” - Ignacio Estrada.

Students have pledged to be the custodians of their cherished institution and uphold its ideals. While providing the finest mentorship for excellence in academics, culture and aesthetics, MVP engenders the responsibility in each student to be the light for others, to lead fearlessly, and to lead with a conscience. The teachers of MVP have endeavoured to find the potential of each child, who is a born genius.

As children embark on journeys unto the unknown, we should fill their young hearts with courage and conviction. We must equip them with the skills and abilities. We should provide them an environment conducive to learning, imagining and achieving. We expect them to meet academic excellence, holistic development, and responsible citizenship.

Through the synergised efforts of teachers and parents, we should ensure that they soar to great heights and create a world full of peace and harmony.

STARS OF MVP

DEBATE

RECIPE

CHOCOLATE SANDWICH:

Ingredients:

- 1 pound chocolate cake
- 6 cups vanilla ice cream
- 1 peanut chikki
- 1 cup chocolate sauce

Procedure:

Cut the cake into thin loaves by rolling the thread around the cake. Make a sandwich by cutting 8-8 pieces of each piece of bread and putting some vanilla ice cream on the triangle piece separately by placing the second piece of cake on top. Put a bowl of ice cream on top of this sandwich, sprinkle chocolate sauce on it and serve it by sprinkling the powder of chikki on top.

SKILL DEVELOPMENT OF INCLUSIVE AND SUSTAINABLE ECONOMIC GROWTH

When skill development is undertaken with the focus on contributing to structural transformation, it automatically results in labour productivity and inclusive growth.

Enabling the next working generation to develop skills can reduce the current economic burden. When educational institutes take a step towards skill development, it can reduce underemployment and unemployment, increase productivity, and improve standards of living. As per the Global skills gap reports the Indian workforce reported the highest skills gap after Brazil. Currently, India has one of the largest workforces in the world. Nearly 500 million people are of working age with the domestic labour market being second only to china. Together these dimensions will contribute to our future prosperity, but we are moving towards growth because sustainability and inclusion will not be possible without growth. The pursuit of economic growth should not

only be about increasing wealth, but also about broader prosperity.

YOGA DAY

Yoga is a most important and precious gift given by nature from ancient times to connect with nature throughout life. It is the practice of uniting the mind and body to achieve perfect harmony between both. It also helps a person get a higher level of consciousness by getting control over the body physically, mentally, socially and intellectually. Yoga is promoted to get practiced daily in the schools and colleges for the betterment of the students and to increase their concentration level. International Yoga Day is celebrated on 21st June every year. This day was initiated as 'Yoga day' in the year 2014. Yoga is practiced to bring spiritual progress in the body and mind for self-development by controlling the inner energy. The inhaling and exhaling of oxygen during yoga is the main motive. Practicing yoga in daily life regularly prevents various disease as well as your fatal diseases including cancer, diabetes, high or low blood pressure, heart ailments, kidney disorders, liver disorders, gynaecological problems and variety of mental problems. Daily Yoga practice provides inner and outer body strength. It helps in strengthening the body's immunity system. Yoga acts as an alternative system of medicine if practiced continuously. It also reduce the side effects of many heavy medications taken daily. The early morning is a good time for practicing yoga like pranayam and kapalbhati, as it provides a better environment to control the body and mind.

THE STORY OF MY LIFE - BOOK REVIEW

Written by:- Helen Keller

The Story of My Life is a heart touching story of the challenges Keller and her teacher Sullivan face to communicate with each other until Sullivan tries the method of finger-spelling the words on Keller's hand.

With this method, Keller gets a breakthrough into the world of communication. For the first time, Keller recognises the word 'Water' through this method, and as she goes on to describe it in her book. With the help of her teacher, Keller learns to read and write and speak in different languages, including learning braille.

Helen Keller wrote this book as a student at the age of 22. The book contains the information from her early childhood to adulthood years, informing public about her struggles to educate herself.

I feel that everyone should purchase this book and be prepared for the challenges.

THOSE DAYS

For the days
in which
we feel trapped
Trapped within ourselves
Our toxic mindset
Completely helpless
With no sense
Of what's gonna be next
I'm gonna share my piece of mind
With myself and y'all
That nothing
Nothin'
Is eternal
It's all gonna end someday
At a certain point
Grasses aren't always green
Nor does autumn can for ever
Hide the beautiful spring
You just have to wait
And develop a hustle within yourself
Hustle to change
Change for better
And for good
And then just wait
For the miracle to happen

INTERVIEW OF AN EX-MVPIAN

ARZOO JAIN

Tax Analyst in Global Tax & Insurance team of Salesforce.com India Private Limited (a subsidiary of Salesforce, Inc.)

Let us know about your school life, your family and your achievements.

I am CA Arzoo Jain. Born and brought in Surat by my amazing parents. My father is a businessman and runs a manufacturing unit of BOPP bags and my mother was tutor earlier. I have 1 younger sibling Nishtha Jain, who is continuing the legacy in MVP! MVP is a second home to me and I always cherish my time spent there. I qualified my CFA L1 in June 2017 and CA Final in Nov 2019 attempt and got selected in Big4 (Deloitte) as Assistant Manager in Transfer Pricing department!

According to you, what should be given more importance - Ambition, Success, Work or Money?

As per me, If you have ambition or desire to do or achieve something, you will put that ambition in your goal by doing the hard work with full dedication, which is the only mantra for successful and wealthy life.

What message would you like to impart to the students of MVP?

Celebrate your success and Learn from your failure. I think how we handle both of these events create the biggest impact on our life's!

Who is your role-model and which qualities of his or her fascinated you?

My role-model are my Parents! I guess a child learns a lot from their parents. My mom, Mrs. Madhu Jain, although she is a home maker, she inspires me to do multi task by managing all the things (social chores and responsibilities towards family) all at once. This quality of her inspires me do multi task in my profession by taking up leads on different projects at same time. My father, Mr. Bimal Jain, like a real life hero, has a spirit of never giving up!! In my childhood, we have seen many difficult times, but his NEVER GIVE UP SPIRIT, makes him smile even on tough days. This quality of him helped me when I failed my CA Final exam. It inspired me to stand up again, study with full dedication and there I was, after 4 months, as CA ARZOO JAIN!!

How did your school help in achieving your dreams?

If you ask me, school acts as a foundation in a student's life. School gives you a platform to nurture your self by exploring different co-curriculum activities. This helps a person in building its personality! MVP has always given me chance to showcase my talent in the form of Bharatnatyam and playing Badminton which built a sense of creativity and sportsmanship spirit. This quality of mine played an important role in my Professional Development and helped me achieving awards like Global Video Content Creator in Deloitte, getting Shoutouts for creative ideas.

Can you tell any one incident that you still remember of your school life?

These 14 years of my life are like a sweet memory and I remember each of it. But my favourite incident was the time we spent in our 11th and 12th. I was among those student who never believed in bunking the class but instead having fun time during the class with our facilities. The recess games, the farewell, the Cultural Captain designation, the preparation for 15th August event, the picnic and much more... have a special place in my heart.

How did you overcome obstacles in your journey to success ?

The first obstacle/ failure in my life was I was not able to clear my CA Final in first Attempt. After being ranked 8th in Surat City in class 12th, clearing my CA CPT and CA IPCC in first go, clearing my CFA L1, and securing 3rd position in BCom in my college, I failed my CA Final by 7 marks. I wanted to fulfil my dreams and I wanted the designation of CA. I got my CA cleared in 4 months and was able to crack the interview in Deloitte and was posted within 2 months.

RIDDLE

I AM TAKEN FROM A MINE, AND SHUT UP IN A WOODEN CASE, FROM WHICH I AM NEVER RELEASED, AND YET I AM USED BY ALMOST EVERYBODY. WHAT AM I?

2) $7893 \times 11 = \underline{\hspace{2cm}}$

TECH PULSE

Some day in the near future, when you save your data to the cloud, it might actually get stored underwater.

The underwater data center concept came into existence at Microsoft in 2014.

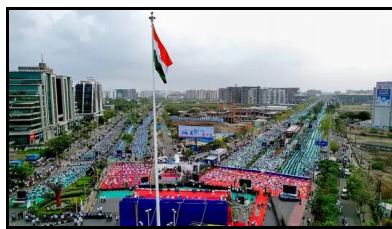

More than half the world's population lives within 120 miles of the coast. By putting data centers underwater near coastal cities, data would have a short distance to travel, leading to fast and smooth web surfing, video streaming and game playing.

The ocean water serves as a natural refrigerator for the data center, which the tech industry collectively spends billions of dollars each year to cool on land. The naturally cold environment removes the need for expensive chillers, offering immediate cost savings

In addition, a submersible data center doesn't need to accommodate any people. No kitchen, no desks, no lights and no oxygen is necessary, that allowed the engineers to build a data center that's very compact. Because there is no staff, the data center also had to be self-sustaining. The ultimate goal is to make computing hardware that can be stored underwater, without supervision, for 20 years or more. Eventually, Microsoft engineers want to harness marine energy so that the center can be even more independent.

There's also no need for permits and leases underwater, which drastically cuts construction and deployment time. A typical land-based data center takes two years to build. The capsule for Leona Philpot was built in just 90 days..

YOGA DAY

Yoga day was organised in Surat ,Gujarat on 21st june, Wednesday. It set a new Guinness World record for the largest gathering at one place with 1.53 lakh people joining the program.

810 students and teachers of SBR Maheshwari Vidyapeeth participated with zeal and enthusiasm and contributed in setting the record.

MATHS MANTRA

Easy method of Multiplication by 11

- Write the rightmost digit of starting number.
- Add each pair of digits write the result down. (carrying digit right to left if required)
- Write down the left most digit (Adding any final carry if necessary)

$$52,432 \times 11$$

5 2+5=7 4+2=6 3+4=7 2+3=5 2

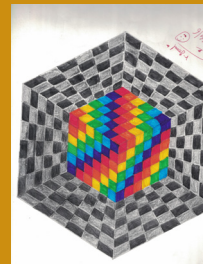

$$576,752$$

	5	8	9	7	4	
	5+1	5+8+1	8+9+1	9+7+1	7+4	
	↓	↓	↓	↓	↓	
	6	4	8	7	1	4

COST OF KNOWLEDGE

I come bearing a rare gift,
Not something of material wealth
No silver, no gold...
No diamonds, no pearls
No bearer bonds, no dollar bills...
No rubies, no emeralds.

Mansi
Bhandari
XI - B

I come with an even more desired thing, the most precious
offering someone can bring
I come with wisdom supreme.

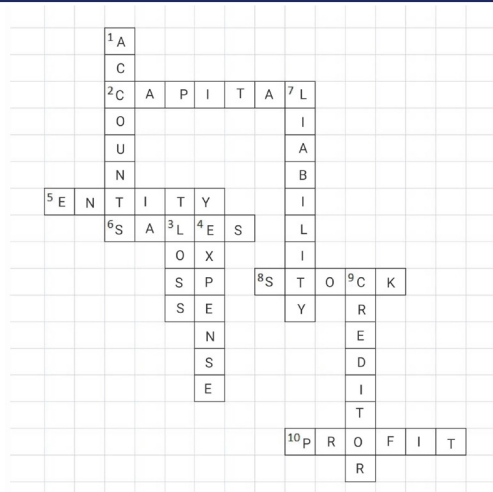

Accept what you want
Reject what u will
But know this :
Knowledge has a steep cost,
Are u willing to pay the bill ?

Your mind will learn of terrifying things
that will produce horrific outcomes
U will witness the apocalyptic path the future portends.
Inventions of destruction ;
Exponential scientific and economic growth;
enormous mass food production
Bringing life policies of starvation and oppression;
Curtailing liberty with freedom of speech suppression .
Are u willing to inherit the foreknowledge of the end ?

This is the cost of knowledge u will to know.

Although this gift is free,
The cost of having it
Will burden your soul heavily
This is knowledge some would die for,
And some would even dare to kill.
Are u sure you're
Willing to accept due payment of this bill ?
